A FIVE CENT STAMP

can bring you a year's complimentary subscription to ELECTROMECHANICAL DESIGN. Just fill out the enclosed qualification card, place the five cent stamp on the reverse side of the card, and mail it promptly. Within a month, you'll start receiving on-the-job assistance with your design problems through the pages of our publication.

Our Editors need the detailed information on the enclosed card so that they can plan articles based on the information you supply us. Checking the four areas in the order of importance of your work permits our staff to pinpoint editorial information that will be of direct value to you.

Our publication is a sourcebook of ideas and techniques in electromechanical research, development and design and the management of these functions. We feel that a complimentary subscription for one full year gives our readers a better idea of the usefulness of our magazine than any descriptive literature.

You can take advantage of this offer with no obligation whatsoever to your company or yourself. If you qualify, magazines mailed to your plant address are free. And - you'll also receive the January and July Systems Designer's Handbooks.

Cordially,

George Palken
Publisher

o
Enc.

P. S. If you have written an article or planning to write an article for publication, drop us a note. We will be happy to send you literature that tells you how to write for ELECTROMECHANICAL DESIGN and the honorarium we pay.
